

NORMAL CORK

Material Normal Cork, this cork sheet consists of a mixture of rubber and normal cork. Properties The structure of these materials, which are resistant to oils and fuels, ensures high conversibility and recovery. Application Sight glass gaskets, for sealing glass to metal or ceramic to metal, cover gaskets for light containers where good resistance to oils, fuels and solvents is required. Technical Data Density g/cm³ 0.6 - 0.75 Minimum surface pressure when installed % 25 - 40 Minimum surface pressure when installed N/mm³ 7 Short-term peak temperature C 150 Maximum continuous temperature Maximum continuous temperature 0.0 - 0.75 135 Box 600 x 2.00 mm Short-term peak temperature 0.6 - 0.75 Maximum continuous temperature 0.6 - 0.75 135 Box 0 x 600 x 2.00 mm Short-term peak temperature 150 Maximum continuous temperature 900 x 600 x 2.00 mm 135 Short-term peak temperature so conding to a drawing, dimensions user user user user user user user use				·
